Rotation 3: Analytics Studio	Create Tableau dashboards & intake process for analytics development.
Rotation 4: Canada IT	Support the Canadian Region with all IT questions and requests.

What is the Technology Leadership Development program (TLDP)?

TLDP is a two-year rotational program focused on developing talented undergraduates into future technology leaders through experiences across multiple areas of Information Technology at Boston Scientific.

How do I get started?

Many of our TLDP hires are graduates of our 12-week summer internship program. Please check with your Career Services Center for questions about Boston Scientific internships and how to apply.

At Boston Scientific, belonging is what we strive for. We take an intentional approach to diversity, equity and inclusion and believe that innovation is only possible when we embrace and advance diverse perspectives.
