Customer Ordering Information

Terms and Conditions:

For Customer convenience, the Boston Scientific ordering system can accept the UPN (Universal Product Number) e.g., H74939053052070 found on the product labeling as well as Boston Scientific's historical order numbers e.g., 39053-05207. Please use either one of these numbers when placing an order via phone, fax, Electronic Data Interchange (EDI) or online. Customer Service Representatives will be happy to help you with any questions. We are eager to help make the ordering process as simple and efficient as possible.

WARNING REGARDING SINGLE USE DEVICES: Products marked as "single-use" are for single-use only. Do not reuse, reprocess or re-sterilize single-use products. Reuse, reprocessing or re-sterilization may compromise the structural integrity of the device and/or lead to device failure which in turn may result in patient injury, illness or death. Reuse, reprocessing or re-sterilization may also create a risk of contamination of the device and/or cause patient infection or cross-infection, including, but not limited to, the transmission of infectious disease(s) from one patient to another. Contamination of the device may lead to injury, illness or death of the patient. Boston Scientific assumes no liability with respect to instruments reused, reprocessed or re-sterilized and makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose, with respect to any such instrument.

NOTE

Indications, contraindications, warnings and instructions for use can be found in the instructions for use supplied with each device.

For more information, please contact your Boston Scientific sales representative.

Products shown are subject to modification without prior notice

Peripheral Intervention Products

Place your order directly with Boston Scientific Customer Service by mail, telephone, fax, Electronic Data Interchange (EDI) or online.

Boston Scientific Corporation
Peripheral Intervention
500 Commander Shea Blvd.
Quincy, MA 02171-1518

Hours

Customer Service is available from 8:30 am EST to 8:00 pm EST weekdays excluding national holidays. All orders need to be placed by 7:00 pm. Our toll-free fax number is available at all times. In addition, Technical and Emergency Service is available 24 hours a day, 7 days a week.

Terms

- Terms are Net 30 Days from date of invoice.
- For peripheral products: All Shipments are F.O.B. Quincy, Massachusetts.
- Prices are subject to change without notice.

Standing Orders

Boston Scientific accepts standing orders on all products. This convenience provides you with scheduled shipments using a single purchase order. Contact the Customer Service DataBase Department at 1.888.325.1060 for details.

Product Exchanges

Product exchanges will no longer be processed with a no charge bill. Instead, customer service will process a return for credit and billing for the replacement product.

Returned Goods

Permission to return merchandise is required for all returns. All items must be in unopened packages. Timeframe for return is 90 days from shipment date. Merchandise returned within 30 days will receive full credit. Merchandise returned within 31-90 days will be subject to a 10% restocking charge. Material that has been opened, damaged or tampered with is not returnable for credit. Products manufactured as SPECIAL or CUSTOM products are not returnable for credit. Boston Scientific Corporation will not authorize returns after 90 days from date of purchase. All merchandise

returned to Boston Scientific Corporation must be accompanied by a copy of the packing slip or invoice enclosed with the original shipment. The Returned Goods Authorization (RGA) number must be clearly marked on the shipping container. Merchandise returned without an RGA number will not be accepted or considered returned.

TO RETURN GOODS

- Contact Customer Service for a return authorization number at 1.800.862.1284.
- For product complaints, please call 1.800.811.3211.
- Identify the customer account number, catalog number, size, quantity, lot number, invoice number and the reason for the return.
- Clearly identify the RGA number on your shipping paperwork.
- Ship product returns to:

Boston Scientific Corporation
Attn: Returns Department, RGA#
500 Commander Shea Blvd.
Quincy, MA 02171

SPECIFICATION CHANGES: NOTICE

As we are continually improving our products, the equipment supplied may not agree in all details with the description and specification shown in the catalog and/or price list. All prices and specifications are subject to change without notice. Federal (USA) law restricts these devices to sale by or on the order of a physician. Indications, contraindications, and instructions for use, as well as product warranty information, can be found in the product labeling supplied with each device.

Boston Scientific Corporation makes no warranties, express or implied, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, except as specifically set forth in the product labeling supplied with each device.

C-Code Cross-Reference Guide to Boston Scientific Peripheral Interventions Products

C-Codes:

C-Codes should be included on all Medicare claims where procedures are billed under the Outpatient Prospective Payment System (OPPS) and a C-Code is assigned. They are used to track the types of devices used during applicable outpatient procedures and to ensure that both procedures and devices are appropriately billed. Separate device reimbursement is not usually driven by C-Code use, but CMS uses the cost data supplied on the claim to set appropriate procedure payment. Some devices can qualify for additional hospital reimbursement through Medicare transitional pass-through payment.

Key Points of the Guide:

- The Guide cross-references Boston Scientific products at the UPN/order number level to CMS associated Category C-Codes.
- Medicare does not have a C-Code category for all BSC PI products. The letters 'N/A' will appear to denote products without a Medicare assigned C-Code.

Changes to Centers for Medicare and Medicaid Services C-Code Policy

Effective January 1, 2005, Medicare identified a number of device-dependent Ambulatory Payment Classifications (APC) that would require C-Code reporting for outpatient procedures to pass C-Code edits. This requirement was enforced beginning April 1, 2005 when CMS began to review claims at the CPT®/HCPCS code level. In the CY 2015 final rule, CMS finalized a policy and implemented claims processing edits that require any of the device codes used in the previous device-to-procedure edits to be present on the claim whenever a procedure code assigned to any of the former device dependent APCs are reported on the claim (79 FR 66795). Despite the expiration of pass-through payment status for device category codes, hospitals are still required to report the device category C-codes on claims when such devices are used in conjunction with procedures billed and paid under the OPPS. For additional information: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/Compleat-list-DeviceCats-OPPS.pdf>

IMPORTANT INFORMATION

Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules, and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. **It is always the provider's sole responsibility to determine medical necessity, the proper site for delivery of any services, and to submit appropriate codes, charges, and modifiers for services rendered.** It is also always the provider's responsibility to understand and comply with Medicare national coverage determinations (NCD), Medicare local coverage determinations (LCD), and any other coverage requirements established by relevant payers which can be updated frequently. Boston Scientific recommends that you consult with your payers, reimbursement specialists, and/or legal counsel regarding coding, coverage, and reimbursement matters.

Boston Scientific does not promote the use of its products outside its FDA-approved label. Payer policies will vary and should be verified before treatment for limitations on diagnosis, coding, or site of service requirements. All trademarks are the property of their respective owners.

This coding information may include codes for procedures for which Boston Scientific currently offers no cleared or approved products. In those instances, such codes have been included solely in the interest of providing users with comprehensive coding information and are not intended to promote the use of any Boston Scientific products for which they are not cleared or approved. The Health Care Provider (HCP) is solely responsible for selecting the site of service and treatment modalities appropriate for the patient based on medically appropriate needs of that patient and the independent medical judgment of the HCP.

	Imager™ II Select Catheters	
	Imager™ II - 5 F Select Catheters	26

Cerebral Curves

Headhunter

Commonly used for carotid, innominate and subclavian access

Simmons

Facilitates access of common carotid, subclavian, renal and contralateral common iliac

Other Cerebral Curves

ST

BARN

Commonly used for guide wire redirect

BERN

Facilitates access of the great vessels

Visceral Curves

Cobra

Commonly used to access abdominal aortic vessels and internal iliacs

Renal

Best suited for steeply angled renal arteries

Chuang

Longer tips facilitate distal access to the celiac and mesenteric systems

Other Visceral Curves

MIK

Assists with access to perpendicular ostia

CONTRA2

Commonly used for contralateral access

SHK 1.0

Commonly used for contralateral access

Imager™ II - 5 F Select Catheters

Braided Torque Cerebral Selective Catheters

Indications: 1 = Superficial Femoral Artery , 2 = Proximal Popliteal Artery

*As Eluvia is a new and novel technology, Boston Scientific believes that currently available C-Codes do not accurately describe it. However, the closest applicable C-Code to report the use of Eluvia is C1874, defined as "Stent, coated/covered, with delivery system."

Magic Torque DLVR is the only 315cm workhorse guidewire optimized to deliver in the SFA, tailor-made for use with Eluvia and Innova
