

Stone Retrieval Guide

Because no two cases are alike.

No two patients present the same anatomical challenges. No two stones are identical in size, shape, or consistency. That's why Boston Scientific offers a comprehensive portfolio of stone retrieval baskets and graspers designed to treat each unique case.

1. Escape Retrieval Basket is designed to be used simultaneously with a 200 micron laser fiber. Do not fire the laser directly upon the basket during lithotripsy.
2. Segura and Gemini can also be used in the kidney and ureter.

Stone Retrieval Devices

Boston Scientific's broad and deep portfolio of stone retrieval baskets and graspers includes all the tools you need to reliably capture the stone and free the patient.

LithoVue Empower™ Retrieval Deployment Device

A physician-controlled stone removal deployment device that integrates seamlessly with the LithoVue™ Ureteroscope and our nitinol baskets.

Dakota™ Nitinol Stone Retrieval Device

This flexible nitinol device gives you the power to capture, reposition and remove multiple stones of varying size and complexity—all in a single procedure.

Sheath size: 1.9F

Zero Tip™ Nitinol Stone Retrieval Basket

This 4-wire nitinol basket is reliable, durable and built to maintain its shape in the most challenging anatomy, even after multiple cycles.

Sheath sizes: 1.9, 2.4, 3.0F

Escape™ Nitinol Stone Retrieval Basket

The unique dual-basket configuration of this powerful device allows you to hold fragments securely in place during lithotripsy, enabling you to work efficiently.

Sheath size: 1.9F

OptiFlex™ 1.3F Nitinol Stone Retrieval Basket

Now you can approach and capture fragments with a flexible basket that gives you the precision and control you need in tight places. With a small 1.3F sheath, the OptiFlex Nitinol Retrieval Basket allows for maximum irrigation and a clear field of view.

Sheath size: 1.3F

Stone Cone™ Nitinol Retrieval Coil

The Stone Cone Nitinol Retrieval Coil is an effective backboard that keeps simple cases simple. It helps increase procedural efficiency by preventing repulsion of stones up the ureter and into the kidney – potentially eliminating the need for a flexible scope during the case.

Sheath size: 3.0F

Coil sizes: 7, 10mm

Segura Hemisphere™ Stone Retrieval Basket

Successfully complete your most difficult ureteral cases with the retrieval device that offers the superior strength and shape retention of stainless steel.

Sheath sizes: 2.4, 3.0, 4.5F

Gemini™ Paired Wire Helical Stone Retrieval Basket

Our Gemini device (available in 3-, 4- and 5-wire configurations) promotes secure grasp of calculi and small stone fragments. It's designed to open and retain its helical shape within the ureter.

Sheath sizes: 2.4, 3.0F

Suggested Uses

Stone in kidney
