## **Boston Scientific Global Energy Management System Policy**

---

### **I Protect our Planet, People, Property and all things Boston Scientific**

Boston Scientific believes that leading environmental performance contributes to our competitive strength and benefits our communities, customers, shareholders and employees. To reduce the impacts of climate change, Boston Scientific has committed to achieving carbon neutrality associated with our manufacturing operations by 2030, and Net Zero across our entire value chain by 2050.

Through our Global Energy Management System (GEMS), Boston Scientific will:

- Embed our carbon neutrality commitment into the organization's Corporate Social Responsibility (CSR) strategy;
- Align with the United Nation's Framework Convention on Climate Change (UNFCCC) COP21 also known as the Paris Agreement on Climate Change;
- Agree the carbon neutrality boundary conditions to be Scope 1 and Scope 2 emissions, as defined by the Greenhouse Gas Protocol;
- Engage and commit top-management to the implementation of the vision;
- Commit to the development of an energy strategy with a roadmap to achieve energy objectives and targets;
- Establish continual energy performance and energy management system improvement as a priority and align individual sites to it;
- Support the purchase of energy-efficient and low carbon products and services that impact energy performance, and design for energy performance improvement;
- Ensure continued compliance with all legal and other requirements related to energy efficiency, use and consumption in our facilities;
- Provide the necessary information and resources to achieve energy performance improvement and carbon neutrality.

This policy will be reviewed annually and updated as necessary to ensure alignment with the CSR strategy. It shall be available via the Boston Scientific Corporation website ([www.bostonscientific.com](http://www.bostonscientific.com)) and communicated within the organization and to relevant interested parties.
