

Trial Design Benefits

RWE Real-World Evidence

RCT **Randomized Controlled Trials**

Diverse patients reflect who's treated in real-world

Physicians with varying experience with device being investigated

> Rapid enrollment, fast data collection & analysis

Published in academic journals

Inform treatment decisions

Subject to bias

Uniform patients based on strict trial criteria

> Experienced physician familiar with device being investigated

Prolonged enrollment, slower data collection & analysis

Reduce bias with increased Reduce bias with controlled design

enrollment
